

Manikanta Ramineni

manikantaramineni113@gmail.com | +91-7207675978 | GitHub | LinkedIn | LeetCode

Professional Summary

AI & Data Science undergraduate with strong foundations in Data Structures, Algorithms, Machine Learning, and Full-Stack Development. Experienced in building AI-powered applications using Python, React, FastAPI, Flask, LangGraph, and modern AI frameworks. Solved 450+ coding problems on LeetCode and passionate about developing intelligent software systems and real-world AI applications.

Education

Chaitanya Bharathi Institute of Technology, Hyderabad

Aug 2023 – May 2027

Bachelor of Engineering in Artificial Intelligence and Data Science

CGPA: 8.84/10

Relevant Coursework: Object-Oriented Programming, Databases, Data Structures, Machine Learning

Technical Skills

Languages	Python, Java, SQL, JavaScript
Frameworks	React.js, Next.js, Flask, FastAPI, Scikit-Learn
Databases	MongoDB, MySQL, PostgreSQL, Redis
Tools	Git, GitHub, Docker, Postman, Firebase
Concepts	Data Structures & Algorithms, OOP, DBMS, OS, Computer Networks
AI/ML	LangGraph, RAG, LLM Applications, Machine Learning, Vector Databases

Projects

Enterprise Autonomous Financial Intelligence Platform *React.js, FastAPI, LangGraph, Redis, PostgreSQL*

- Engineered a multi-agent financial intelligence platform automating document analysis, compliance checks, risk scoring, and portfolio insights using LLMs.
- Developed a LangGraph orchestration layer coordinating AI agents for research, compliance, risk assessment, market analysis, and strategy generation.
- Implemented RAG-based knowledge retrieval over financial reports using vector search, semantic embeddings, and reranking techniques.
- Built explainable AI workflows with risk attribution, anomaly detection, confidence scoring, and observability dashboards.

Enterprise Knowledge Intelligence Platform *React.js, FastAPI, LangGraph, RAG, PostgreSQL, Redis*

- Designed and developed an enterprise knowledge intelligence platform that transforms unstructured organizational data into searchable, actionable insights using LLMs and RAG.
- Implemented advanced retrieval mechanisms with vector databases, semantic search, hybrid ranking, and document chunking to improve answer relevance and retrieval accuracy.
- Built autonomous AI agents for research, document analysis, summarization, policy compliance checks, and cross-document reasoning using LangGraph orchestration.
- Developed interactive dashboards and monitoring systems to track agent performance, retrieval quality, response confidence, and user engagement metrics.

AI Nutrition Tracking System *Python, Streamlit, Firebase, Gemini API*

- Developed an AI-powered nutrition tracking application that analyzes food images and estimates nutritional values in real time.
- Integrated Gemini API for automated food recognition, calorie estimation, and personalized nutritional insights.
- Implemented Firebase authentication, OTP verification, and Firestore database for secure user management.
- Built interactive dashboards to visualize daily intake, nutrition trends, and health reports.

Certifications

- AWS Certified Cloud Practitioner – Amazon Web Services (2026)
- Deep Learning Specialization – DeepLearning.AI / Coursera (2026)
- Machine Learning – Andrew Ng, Stanford / Coursera (2025)
- MongoDB Python Developer Path – MongoDB (2024)
- Data Structures and Algorithms in Java – NPTEL (2024)

Achievements

- Solved 450+ coding problems on LeetCode across Arrays, Trees, Graphs, Dynamic Programming, and Advanced Algorithms.
- Built multiple AI-powered applications using LLMs, RAG, Multi-Agent Systems, and Full-Stack technologies.
